

connect__on_authorized

handle__connack

db__message_reconnect
_reset

```
graph LR; A[connect__on_authorized] --> C[db__message_reconnect_reset]; B[handle__connack] --> C;
```

The diagram illustrates a flow where two functions, 'connect__on_authorized' and 'handle__connack', both point to a single target box labeled 'db__message_reconnect_reset'. The target box is shaded gray, while the source boxes are white. Blue arrows indicate the direction of the flow from the source functions to the target database message.
